

FG MANUAL ACTUATOR

SIMPLIFY YOUR JOB

FG MANUAL ACTUATOR from Full Gauge Controls is an accessory that allows to **manually open and close** electronic expansion valves, making it easier to maintain and test activation in refrigeration systems.

By turning the actuator, the electromagnetism applied to the valve quickly and **easily opens and closes** the fluid flow in the pipeline. This solution offers **more advantages and convenience** for you, the technician.

FG MANUAL ACTUATOR is compatible with the following valve models:

SB103T, SB105T, SB108, SB108T, SB110, SB110H, SB110T, SB114, SB114T, SB115H, SB118, SB118T, SB124, SB124H, SB124T, SB130, SB130T, SB132, SB132T, SB145, SB152, SB155 and SB162.
